Professional Summary

Final-year Computer Science undergraduate at NIT Patna with strong foundations in data structures and algorithms. Experienced in designing scalable backend systems, building RESTful APIs, and developing full-stack applications using modern frameworks. Demonstrated ability to architect production-oriented solutions through projects involving distributed services, database optimization, and AI-driven workflows.

Education

National Institute of Technology Patna — *2022 – 2026*
Bachelor of Technology in Computer Science and Engineering — CGPA: 6.73

Sri Chaitanya Boys Jr. College, Nidamanuru — *2020 – 2022*
Board of Intermediate Education, Andhra Pradesh — Percentage: 65%

Govt. High School, DIET Rayachoty — *2019 – 2020*
Secondary School Certificate — Percentage: 96%

Projects

Campus AI Agent — *Jan 2026*
Tech Stack: FastAPI, React, MongoDB, Groq LLM
- Engineered a scalable full-stack AI-powered campus assistant supporting natural language queries and automated resource bookings
- Designed an LLM-driven intent routing layer to intelligently map user requests to backend services
- Developed a stateful booking engine with session management and conflict validation for reliable resource allocation
- Built modular REST APIs and optimized database interactions to enhance system performance and scalability

RumorNet – Fake News Detection Platform — *Dec 2024*
Tech Stack: Python, REST APIs, Scikit-learn, Hugging Face
- Developed an end-to-end backend pipeline for text processing, classification, and inference
- Integrated machine learning models into a service-oriented architecture for real-time predictions
- Optimized data preprocessing and API response time for production-scale usage
- Deployed and monitored the application with live inference support

Multimodal Phishing Detection System — *Mar 2025*
Tech Stack: Python, PyTorch, OCR, Web Automation | Guide: Prof. Dr. Bhaskar Mondal
- Built an automated data pipeline to process 34,000+ URLs, extracting structured and unstructured data
- Designed modular services for data crawling, preprocessing, and classification
- Implemented fault-tolerant batch processing to handle failures and automated retries
- Improved system scalability and performance through efficient batching and pipeline optimization

Technical Skills

Programming Languages: Java, Python, C++, SQL
Core CS Concepts: Data Structures & Algorithms, OOPs, Operating Systems, DBMS
Backend & APIs: FastAPI, Node.js, Express.js, RESTful Services
Databases: PostgreSQL, SQLite, MongoDB
Frontend: HTML, CSS, JavaScript, React, Angular
Tools & Platforms: Git, GitHub, Docker, Postman, GitHub Actions, Vercel, Render
Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Time Management

Certifications

- **Deloitte Technology Virtual Experience Program:** Completed industry-simulated engineering tasks involving API development, debugging production issues, and implementing real-world technology solutions
- **AWS Solutions Architecture Simulation:** Designed scalable cloud systems using EC2, RDS, S3, ELB, and CI/CD pipelines

Achievements

- **Competitive Programming:** Solved 470+ DSA problems on LeetCode
- Top 7 finalist in **Bajaj Finserv Health Datathon** (IITs/NITs/BITS) for OCR-based automation solution
